# PROGRAM THE REMOTE TRANSMITTER
NOTE: The Transmitter is factory set to mode 1. The mode of the Remote Transmitter can be changed to fit your type or style of training.

TO CHANGE THE MODE:

1. Referring to the following tables, adjust the Intensity Dial and Toggle Switch to the mode you want to use.
2. Turn the Remote Transmitter over and remove the belt clip (if attached).
3. Using a pen or the tine on the buckle of your collar strap, depress and release the mode button. When the mode button is pressed, the Transmitter Indicator Light will be solid in color. When it is released, it will flash the mode selected.

For example, if mode 5 is desired, adjust the Intensity Dial to Level 5. Once the mode button has been depressed, the Transmitter Indicator Light will be solid, and once the mode button is released, the Transmitter Indicator Light will flash 5 times. However, if you select mode 8 (ID Code) in the **UP** position or mode 2 in the **DOWN** position, the light will remain solid in color once the mode button is released.

TOGGLE SWITCH IN
THE **UP** POSITION

TOGGLE SWITCH IN
THE **DOWN** POSITION

TOGGLE SWITCH IN THE UP POSITION

MODE	UPPER BUTTON FUNCTION	LOWER BUTTON FUNCTION	SIDE BUTTON FUNCTION	TOGGLE SWITCH (up/down)	NUMBER OF DOGS
1	Continuous stimulation (Level set by intensity dial)	Momentary stimulation (Level set by intensity dial)	Tone only	Dog 1 / Dog 2	2
2	Continuous stimulation (Level set by intensity dial)	Low Continuous stimulation (Level set by intensity dial)	Tone only	Continuous/ Momentary	1
3	Continuous stimulation (Level set by intensity dial)	Continuous stimulation (Level set by intensity dial)	Continuous stimulation (Level set by intensity dial)	Dogs 1-3 / Dogs 4-6	6
4	Continuous stimulation (Level set by intensity dial)	Tone only	Remote Beeper (SD-BEEP) Call/Locate Mode - single tone*	Dog 1 / Dog 2	2
5	Continuous stimulation (Level set by intensity dial)	Momentary stimulation (Level set by intensity dial)	Remote Beeper (SD-BEEP) Call/Locate Mode - single tone*	Dog 1 / Dog 2	2
6	N/A	N/A	N/A	N/A	N/A
7	Continuous stimulation followed by a ¼ second delay tone (Level set by intensity dial)	Momentary stimulation followed by a ¼ second delay tone (Level set by intensity dial)	Continuous stimulation + 2	Dog 1 / Dog 2	2
8 (ID Code)	N/A	N/A	See below**	Up position	N/A

NOTE: Modes 1, 3, 4 ,5 and 7 provide 8 levels of stimulation, which correspond to the setting of the Intensity Dial.
Mode 2 provides more "increments" to choose from – a total of 16 levels of stimulation. For example, in mode 2 with the Intensity Dial set at 2, the lower button provides level 3 of 16 and the upper button provides level 4 of 16.

* To enable Run Mode, press and hold the corresponding Locate Button for 3 seconds.
** An ID Code is the signal identification between the Remote Transmitter and Collar Receiver. Each is programed in 1 of 4,000 ID Codes from the factory. In the rare event that a Remote Transmitter is sending a signal to more than one Collar Receiver, you can change the Remote Transmitter's ID Code to prevent this from happening. There are 64 programmable ID Codes available.

TO MANUALLY PROGRAM THE REMOTE TRANSMITTER'S ID CODE FOLLOW THESE STEPS:

1. Turn the intensity dial to level 8, flip the toggle switch up, and then press and release the mode button on the back of your Remote Transmitter. This does not change the mode, so the current mode will still be active after the ID change is complete.
2. Once the mode button is released, the green indicator light will illuminate and stay on for 15 seconds.
3. While the green light is on, turn the intensity dial to select the 1st digit of the ID and then press and release the side button. The green light will flash rapidly confirming selection.
4. Again, while the green light is on, turn the intensity dial to select the 2nd digit of the ID and then press and release the side button. The green light will flash rapidly confirming selection. The 2nd digit is optional, and if not desired, just wait until the green light turns off and refrain from pressing the side button.
5. At the end of 15 seconds, or after the second press of the side button, the green light will turn off and the ID/frequency of the unit will be updated. At this point, the unit will be in the same mode it was in prior to setting the ID.
6. Upon changing the ID Code, you will need to match the Collar Receiver to the Remote Transmitter.

NOTE: If you press the side button only once (skipping Step 4) the ID is still a two digit ID. The left digit is defaulted to 1. For example, if you selected 6 in Step 3 and pressed the button only once, the ID you get will be 16.

To return the unit to the factory ID either remove the battery or follow these steps:

1. Turn the intensity dial to level 8, flip the toggle switch up, and then press and release the mode button on the back of your Remote Transmitter. This does not change the mode, so the current mode will still be active after the ID change is complete.
2. Do not press any buttons and wait until the green indicator light turns off.
3. You will now need to match the Collar Receiver to the Remote Transmitter.

TOGGLE SWITCH IN THE DOWN POSITION

MODE	UPPER BUTTON FUNCTION	LOWER BUTTON FUNCTION	SIDE BUTTON FUNCTION	TOGGLE SWITCH (up/down)	NUMBER OF DOGS
1	Continuous stimulation (Level set by intensity dial)	Momentary stimulation (Level set by intensity dial)	Vibration only	Dog 1 / Dog 2	2
2	Continuous stimulation (Level set by intensity dial)	Low Continuous stimulation (Level set by intensity dial)	Programmable Continuous stimulation**	Dog 1 / Dog 2	2
3	Continuous stimulation (Level set by intensity dial)	Tone w/ one second delay Continuous stimulation	Vibration only	Dog 1 / Dog 2	2
4	Continuous stimulation (Level set by intensity dial)	Low Continuous stimulation (Level set by intensity dial)	Vibration only	Continuous/ Momentary	1
5	Dog 1 (Level set by intensity dial)	Dog 2 (Level set by intensity dial)	Dog 3 (Level set by intensity dial)	Continuous/ Vibration	3
6	Continuous stimulation (Level set by intensity dial)	Tone only	Vibration only	Dog 1 / Dog 2	2
7	Continuous stimulation (Level set by intensity dial)	Vibration only	Remote Beeper (SD-BEEP) Call/Locate Mode - single tone*	Dog 1 / Dog 2	2
8	N/A	N/A	N/A	N/A	N/A

NOTE: Modes 1, 3, 5 ,6 and 7 provide 8 levels of stimulation, which correspond to the setting of the Intensity Dial.

Modes 2 and 4 provide more "increments" to choose from – a total of 16 levels of stimulation. For example, in mode 2 with the Intensity Dial set at 2, the lower button provides level 3 of 16 and the upper button provides level 4 of 16.

* To enable Run Mode, press and hold the corresponding Locate Button for 3 seconds.
** After selecting mode 2 and while the green indicator light is still solid in color, turn the intensity dial to the desired Continuous Stimulation level and press the side button to set the level. The green light will quickly flash acknowledging your selection. For example, if you turned the intensity dial to 3, the side button on your Remote Transmitter will transmit Continuous Stimulation at level 3 when pressed. If no level is selected after 15 seconds, it will default to level 8.
